### Citibank Alerting Service - new feature launched!

Click on the picture to  
enlarge it.

Last week the new essential feature for Citibank Alerting Service users was launched - a combo-balance alert via sms and email. This feature allows the customers to get the balance details on all accounts in a single sms/email message.

This is an essential feature to make Citibank Alerting Service more user friendly and convenient to use. Citibank Russia thanks all customers who have sent their feedback and suggestions.

The combined balance alert will automatically replace the individual account balance alerts for those customers who have chosen to receive them. To edit your subscription profile, change contact details or subscribe to the service, please choose "Sign On to

Alerting Service" from our homepage.
